04	30/04/2014	Melinda Kuthy	TALOS	Final version

Statement of originality:

This deliverable contains original unpublished work except where clearly indicated otherwise. Acknowledgement of previously published material and of the work of others has been made through appropriate citation, quotation or both.

EXECUTIVE SUMMARY

This deliverable reports the first release of the SDI4Apps website and its connection to social network sites.

The website is available at <http://sdi4apps.eu/> (Figure 1). It is based on the WordPress¹ free web software that enables easy integration with social network sites, for example Twitter, Facebook, Google+. Social network sites will play an important role in dissemination and collecting user feedback.

A specific group on Linked-In was set up by renaming an existing one (Geoportal4everybody) with more than 400 registered users (Figure 2). The previous group had a very similar scope to SDI4Apps. Therefore, the audience is relevant to the SDI4Apps topic.

The website currently provides some basic information about the project, partners, objectives and links to social network sites and contact details. The website will be regularly updated and will include intermediate and final project results, public reports, publications, newsletters, project events and user community involvement.
